Heat Exhaustion vs. Heatstroke

Heat Exhaustion (HE) occurs when your body struggles to keep cool in a hot environment.

Signs can include:

- Nausea
- Mild confusion
- Vomiting
- Feeling lightheaded
- Dizziness
- Trouble walking straight

If it's suspected you have HE, you must be taken to a local medical facility for care during training. During operations, combat medics or a battalion aid station can provide the right care.

Exertional Heatstroke (EHS) is when your body temperature gets too high (usually over 104°F). Extreme body temps are serious. They can cause organ damage and even be life-threatening. The first sign of EHS is usually a change in your mental state.

Signs include:

- Seizures
- Confusion, trouble performing simple tasks
- Fatigue and weakness
- High core body temperature (often > 104°F)
- Combativeness
- Loss of consciousness, fainting

History is made at Camp Charlie.

Another chapter in the OLS Mission History is now in the books with the completion of the first round of deployment of the Florida State Guard (FLSG) to Eagle Pass.

While the FLSG has been serving in smaller a capacity during the mission, this was the first deployment of a platoon size element to the border mission. The (FLSG) Soldiers assisted and worked alongside the Texas National Guard to continue to fortify the border.

TF-Eagle Command and Camp Charlie were grateful for all the assistance and support of the first deployment team and now have the opportunity to welcome the second deployment team to the TF-Eagle family.

Identifying and Preventing Heatstroke

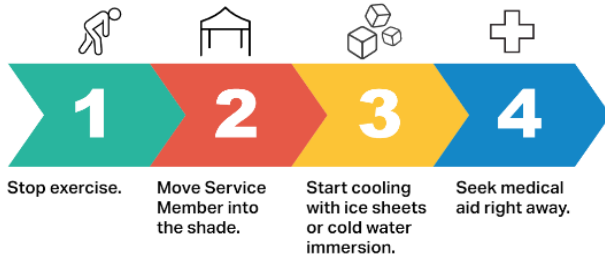

Heatstroke often occurs when your body overheats during heavy work, training, or exercise in the heat.

KEY SIGNS & SYMPTOMS

- Confusion, trouble performing simple tasks
- Combativeness, irritability
- Slurred speech
- Nausea, vomiting
- Fatigue, weakness
- High body temperature (>104°F or higher)
- Lack of coordination, trouble walking (ataxia)
- Dizziness, seizures
- Loss of consciousness, fainting (syncope)

If you or a buddy experience any of these symptoms during moderate to hard exercise in the heat, assume it's heat stroke.

4 STEPS CAN SAVE A LIFE

Heat Illness Prevention Tips!

[This Guide](#) will help us to ensure proper fluid replacement as temps continue to rise as well as signs and symptoms of heat illnesses.

TF INFO

30 MAY 2024

CHAPLAIN'S CORNER

Bless the families of the fallen. Lord God, Help them to walk wisely. To stay covered in your armor. Make them constantly aware of what lurks close by whether on the battlefield or at home. Help them to be men and women of prayer. Help them to stay united and strong, bold and resolute, determined and unwavering as they navigate life without their loved one. Oh God, we thank you for the freedom you have given to us, and for the price that was paid so that we could live free. We remember today. The cost of it all. The great sacrifice for freedom. We thank you for the brave men and women who have fought, and continue to fight, so courageously for our nation. We ask for your covering and blessings over them and their families. We pray that you would be gracious and encircle them with your peace.

We pray for your great favor and goodness to be evident in their lives, as well as our own. As we mourn and remember the men and women we have lost on OLS may our memories of them and their impact on our lives stay fresh in our hearts and minds. Give us strength to press on and fight on. May we never forget!

- CH (MAJ) Eric M. Gerber -
