AGR POSITION DESCRIPTION**Nuclear Medical Science Officer**

-Serves as the Nuclear Medical Science Officer and principle science advisor to the 6th WMD-CST Commander in support of civil authorities at man-made and natural disaster incident sites by rapidly identifying Chemical, Biological, Radiological, Nuclear agents and unknown substances, assessing current and projected consequences, advising on response measures, and assisting with appropriate requests for additional support.

-Directs analytical operations in the aftermath of a WMD event using the mobile Analytical Laboratory System (ALS). Leads a 4-person analytical lab team; oversees/manages laboratory instrumentation and equipment worth over \$1.8M. Ability to serve as the team's liaison with civilian agencies, first responders, and laboratory personnel during and after an incident involving WMD materials. Provides assessments through reach back capability to designated state and federal agencies with additional technical expertise, including strategic reach back to national laboratory response networks and SMEs. Operate the Mobile Analytical Labs system including the Gas Chromatograph/Mass Spectrometer, Joint Biological Agent Identification and Diagnostics System, Infrared spectrometer, Infrared Micro-Spectrometer, and Olympus Polarized Light Microscope and Fluorescent Microscope, and various other systems to enhance the team's ability to identify all biological threat agents and virtually all chemicals and chemical compounds. Process gamma spectra using Peakeasy in order to identify specific radionuclides. Have a thorough understanding of handheld scientific monitoring and identification equipment used by the WMD-CST Survey team, and know how to employ and interpret data from those instruments. Rapidly assess a chemical incident by identifying chemical warning placards, signs and symptoms of victims, and witness information then utilizing the Emergency Response Guidebook (ERG) and the National Institute for Occupational Safety and Health (NIOSH) Guide. Understands toxic industrial chemical threats and all chemical threat agents including their effects on people, downwind hazards, persistency, decontamination, and medical treatment of victims. Understands all biological threat agents including Viruses, Toxins, and Bacteria including their effects on people, downwind hazards, how they are transmitted, persistency, decontamination, and medical treatment of victims. Understands all radiological threats including its effects on people, downwind hazards, dose, dose rates, occupation exposure guidelines, decontamination, and medical treatment of victims. Conducts scientific analysis as part of the CST Medical-Analytical team to identify products and processes at a WMD incident based only upon incomplete information from witnesses, signs and symptoms of victims, and samples of pre-cursor chemicals and degradation products. Recommends sampling collection plans at WMD incident sites to gather appropriate samples for identification. Maintains an ISO 17025 accreditation for the mobile lab. Actively participates in mission briefings before and after entering an incident site including the review of all known information on the hazard, wind direction and speed, safety precautions, types of tests to be accomplished, and mission GO or NO-GO criteria. Able to report to the unit on short notice, when not on leave or pass, for immediate emergency response to suspected WMD incidents. Functions in a non-traditional, all AGR, full-time National Guard unit.
