I am John Smith, an eighteen year old graduate from Pine Creek High School. For the past four years I have challenged myself to grow into an educated, hardworking, and successful young man. I have excelled athletically by obtaining spots on the high school's cross country and track and field varsity teams. Academically, I challenged myself by taking honors and advanced placement classes. This accomplishment resulted in me being inducted in the National Honor Society Chapter and the Spanish Honor Society at my school. At the end of it all, I pridefully finished high school with a 3.7 GPA. Because of these and other accomplishments, I firmly believe that my education, varsity sports, volunteering, strong values and wits have prepared me to serve with success in the National Guard.

Be it school or work, I have always strived to be the best in anything and all that I do. That may be something as small as correctly filling out notes at school to filling up a spray bottle at work. I have also become very detail oriented. By doing so, I am able to complete tasks in an excellent manner. Without successfully completing small tasks, it is nearly impossible to excel in larger tasks further down the road. By always keeping this mindset, I have inspired my classmates and coworkers to do the same. I have noticed an increase of quality in the environments around me just by having that mentality.

When asked to describe myself I would say that I am an empathetic leader. This is because I sincerely enjoy watching people succeed as much as I enjoy succeeding myself. Therefore, I like to step up and lead my peers to complete tasks as a team. From experiences such as leading a group project at school to training new employees at work, I have learned that it is easier to complete tasks as a group rather than alone. During the past four years, I have never shied from standing out amongst my peers to lead and succeed. This quality will help me easily fit in a military environment that demands young leaders to forge strong teams.

As an accomplished, yet humble young man, I continuously strive to raise the bar and set an example to those around me. I do this while always keeping an open mind and a kind heart. I have proved to be on the right path towards a successful career and I am confident that I will be a steadfast leader in the National Guard. I have no doubt that I will provide an unwavering commitment to mission accomplishment, diversity, success, and integrity. I will do this while studying astronomy at Texas Christian University. I am set on never slowing down and always succeeding. My experiences and diligent mindset have set me up to be a perfect candidate for this rigorous nomination.

Thank you for your time and consideration.

Am I on Track for College?

Look for the green, yellow, or red symbols next to your section scores. They let you know if your scores are at or above the benchmark scores. Benchmarks show college readiness. If you see green, you're on track to be ready for college when you graduate.

If you score below the benchmark, you can use the feedback and tips in your report to get back on track.

Benchmark scores:

Evidence-Based Reading and Writing: 480

Math: 530

How Do My Scores Compare?

A percentile shows how you scored, compared to other students. It's a number between 1 and 99 and represents the percentage of students whose scores are equal to or below yours.

For example, if your Math percentile is 57, that means 57% of test takers have Math scores equal to or below yours.

The Nationally Representative Sample Percentile compares your score to the scores of typical U.S. students.

SAT[®] User Percentile compares your score to the scores of students who typically take the test.

How Can I Improve?

To see which skills are your strongest and what you can do to boost your college readiness, go to your full report online and look for Skills Insight[™].

What Are Score Ranges?

Test scores are single snapshots in time—if you took the SAT once a week for a month, your scores would vary.

That's why score ranges are better representations of your true ability. They show how much your score can change with repeated testing, even if your skill level remains the same.

Colleges know this, and they get score ranges along with scores so they can consider scores in context.

Your online score report shows your score ranges.
